

# MINES AND MINING STOCKS = FINANCIAL AND COMMERCIAL

# ANOTHER DEAL FOR PARK CITY

One-third of Stock in Rochester Co. Landed by R. G. Wilson.

LITTLE CHIEF'S SHIPMENT

ORE FROM LATEST STRIKE IS A LITTLE DISAPPOINTING.

One-third of the capital stock of the Rochester Mining company yesterday Main Furnace and Roaster Buildings passed into the hands of R. G. Wilson. The name of the vendors he declined to release, as well as the price paid, but he appeared to be well satisfied with his bargain. As there are only 100,000 shares in the company, with nearly one-quarter of the amount still in the treasury and unissued, Mr. Wilson's purchase gives him, to all intents and purposes, control of the corporation.

The Rochester company's property consists of four patented claims in the Snake Creek district. Park City, di-Snake Creek district, Park City, di-rectly west of the St. Lours-Vassar, Southern Tier and Lone Pine companies' groups of claims. It has been opened through shafts and tunnels and in the early days produced considerable

Mr. Wilson recently made an examination of the workings and sized up surface conditions as well. He is of the opinion that it can be again converted into a good producer without any great amount of work. While it is getting pretty well along in the season to think of accomplishing much before winter closes in, he says that an effort will be made to get the other shareholders in line, at least by next spring, with the idea of properly equip-

ping and operating the property.

In the meantime he feels that he work being done by the other properties mentioned to the east of the Rochester will demonstrate, in a man-ner, the possibilities of the Rochester ground. Judge C. S. Zane is president ground. Judge C. S. Zane is president of the company and H. G. McMillan is secretary. The stock is largely owned by old-time operators, and when the time comes it is thought no dif-ficulty will be experienced in getting unanimous consent to bring the property to the front again.

### LITTLE CHIEF SHIPMENT.

Initial Carload Falls Short of Expectations in Value.

The first carload of ore from the Lit-tle Chief's new strike will be on the market today. Assays on the controls were out yesterday and while the returns were somewhat in the nature of a disappointment, conditions at the mine fully warrant the belief that future shipments will materially exceed in value those of the original consign-ment. The lot carries 13.10 ounces sil-ver, 31.3 per cent lead and 60c in gold per ton as shown by the single certifiate received late in the afternoon, and is not thought that the check assay

will disclose any material change.
While the figures are not as large as some of the specimen assays taken seemed to indicate the average would

seemed to indicate the average would be, there is nothing particularly discouraging in them, as the rock had to be taken just as it came without any chance to sort the ore. Since the strike was made the ore body has been widening out and it is reported to be giving evidence of developing into a large hody. It is of such a character that to mine it costs little, and though the values should not materially increase; it can be hannot materially increase, it can be han-dled at a nice profit if the tonnage is there. The ore was struck in a raise thirty-five feet above the 800-foot level and it is holding out well. On the 1.000-foot level the indications are that the same chute will be encountered there in the very near future and the management is confident, from the appearance of things, that it will be found bigger and richer below.

### SAMPLES FROM NEVADA MINE Manager Justice Brings Big Batch From the Tonopah-Utah.

Manager J. L. Justice of the Tonopah-Utah company arrived from that promising property near Dyer, Nev., by the southern route on Wednesday, somewhat under the weather. He was somewhat under the weather. He was about for a time yesterday and will likely be feeling all right by today. Mr. Justice brought with him between 150 and 200 pounds of samples from the latest strike, which he will classify and submit to the assayer today. That he has fine ore in the mine is evidenced by the samples brought in, but what he is after is to learn just what the different characters of the rock will show so that in mining at so remote a distance from assay furnaces he will be able to direct the sorting of the ore to the best advantage.

be able to direct the sorting of the ore to the best advantage.

The management of the company fully expected that Manager Justice would confront them with a demand for several thousands of dollars with which to place the proposition on its feet. But he did nothing of the kind. He simply stated that he wanted money enough to get the workmen under cover for the winter months promet

Great preparations are being made for the trial of the suit between the Petro and Highland Boy Consolidated companies, which is scheduled to come on for hearing before Judge Hall next month. The case is one involving the extralateral rights of the Highland Boy Consolidated, which has entered and opened up probably \$200,000 worth of ore in Petro ground.

The Petro is the plaintiff company, and for that reason the defendant corporation is going to a great deal of

poration is going to a great deal of expense to prove its right to follow the vein from its own down into Petro territory. The case promises to be one of the most interesting ever brought into court from the Bingham district.

### UTAH CONSOLIDATED AFFAIRS.

Speculation on Another Dividend-Changes at the Smelter.

dated, as mentioned in a special to The Herald last Sunday morning, and the contemplated changes at the company's smelter, a Boston

pany's smelter, a Boston publication has the following: "Leading New York interests in Utah Consolidated are looking for another dividend of \$1.50 per share, to be declared this year, making \$3 per share. They say that the Utah company is easily earning this and enough more to a share the say that the say the say that the say the say that the say the s

for its contemplated smelter kirely satisfied with its Wethey fur-

naces and is gradually exchanging them for the McDougail furnaces, which are successfully in use in the big Washoe plant at Anaconda. It now has six McDougall furnaces and three Wethey furnaces and the use of both kinds in the Highland Boy plant has demonstrated that the McDougall type is the more economical.

type is the more economical.

"The company will raise its stack fifty feet and it is hoped that his will carry off the gases which have proved so destructive to agriculture in the Salt Lake valley and which have to date resulted in many law wills against date resulted in many law suits against e company.
"It is the belief that with the smelter

enlarged one-third, and with no foreign tax upon its earnings, the Utah com-pany will not have much difficulty in earning \$5 per share for its stock on a 13-cent copper market."

# PROGRESS AT YAMPA SMELTER.

Looming Up. Manager James W. Neill and Con-tructing Engineer J. M. Callow spent Wednesday at the new smelting plant of the Yampa, at Bingham. Mr. Neill stated yesterday that work was progressing fairly well, but not as fast as the management would like. There was no particular kick against those who are furnishing the materials used in construction and equipment, but un-skilled labor with which to push the rough work about the premises was hard to obtain.

The main furnace and roaster build-

ings are rapidly assuming form and it will not be many days till the former is under cover. The latter will not be far behind, and everything now points to the fact that the plant will be well along toward completion before bad weather acts in Had everything rows. weather sets in. Had everything gone along as expected in the beginning, the smelter would have been in commis-sion during November, but it now looks as though it will require crowding to get things moving by Christmas

### MINING STOCK EXCHANGE.

With the White Metal Steadily on the Rise, Stocks Decline.

the Rise, Stocks Decline.

The mining share market continued in a groggy condition yesterday and trading was light. Star Con. spruced up a little at the close, but otherwise there was nothing to indicate an improvement, notwithstanding the fact that silver jumped up nearly ic an ounce. A few months ago the talent was prone to attribute the weak and declining market to the ruinously low price of silver. With the white metal now commanding approximately like an ounce more than it was then, many of the stocks in producing properties are bringing no more and some of them less than they were at that time—along in February. Now the same oracles attribute the weakness to "profit-taking!"

Daly-West, to which the rise in silver during the week means additional earnings of about \$12,000 per month, is selling at \$33, while Ontario, Grand Central, Tetro, Uncle Sam, Yankee Con, and a number of others to which the increase in the selling price of silver means everything, are dragzing along at figures which seem ridiculously small.

There is hardly a mine or prospect in the state that is not two to one better than it was, physically, at the beginning of the year, and the assertion applies to gold and copper mines as well—as to the silver-lead producers, while the present trend of the market would indicate that just the opposite is true.

Without going into detail, the record of sales made yesterday shows pretty conclusively that a lull in the ranks of buyers is on and that trading is very largely professional.

During the day a total of 39,555 shares of stock, with a selling value of \$12,948.75, changed hands, the list of closing quotations and record of sales made being as follows:

sampler and will likely be on the martoday.

I anager H. S. Joseph left for the SilShield at Bingham last night. From
the will go over to Tintic today and
work started on the new La Reine
ift.

I printing to the metal as the constraction in the iron and steel trade, of course aggravated the weakness of
this stock.

All sorts of assertions were in circulation of cancellation of orders in different
lines of industry. The downward plungs
of United States Steel preferred at the
last carried it to 63, where it closed, a net
loss of 4½. Losses ran to about three
points in Ballimore & Ohio, Reading,
Union Pocific and St. Paul, which were
among those most acutely affected.
Losses of 1 to over 2 per cent were quite
general throughout the list. The grangers showed some early desistance, owing
to the reported escape from damage of
the reported esc

using countries to agree on that figure as a basts of international exchange by the time mentioned.

That the Pioneer sampler, at Sandy, is beginning to do business is indicated from the way it is turning out ore for its parameter of the way it is turning out ore for its parameter of four firms and four from Eingten from Thitts and four from Eingten from Thitts and four from Eingten from Thitts and four from Nevada, through, while yesterday the record was eight from Tinte and one from Nevada, the plant has a normal capacity of forty toms per hour, but just to show what was the following from the way in thirty minutes.

WEAK HOLDERS FORCED INTO LIQUIDATION.

New York, Sept. 24.-The stock market wallowed in a slough of despendency today. Prices crumbled away first here
and then there and the closing showed
a resumption of tone of demoralization
which characterized the markets of July.
The break in prices was unaccounted for
by any new developments. All the news,
whether good or bad, was interpreted in
an unfavorable way by discouraged traders. The relief measure of the United
States treasury, announced yesterday,
which seems to make \$20,000,000 readury
available to the money market, was used
by the traders in the stock exchange to
insinuate dark possibilities undisclosed in
the situation which made necessary this
unexpected measure of relief. The ari
was full of rumors of "something overhanging the market."

Diligent inquiry in the banking community and in, brokers' offices failed to
disclose any definite information of this
mysterious something. Persistent and
urgent character of the selling, however,
gave force to the rumors and kept sentiment disturbed and nervous all day. The
futility of the treasury relief measure to
afford comfort to holders of securities,
as well as the prevailing low rate for
runney, is a pretty reliable indication that
the trouble is not with the money condition. Those who can borrow money at
all can borrow it on reasonable terms.
This points to the conclusion that those
who cannot borrow money on any
terms, at least for employment in , ne
projects for which they seek funds. The
looked upon to some extent as symptomatic.

The extension in new enterprises whose wallowed in a slough of despendency to-day. Prices crumbled away first here

### GRAIN AND PROVISIONS.

GRAIN AND PROVISIONS.

Chicago. Sept. 24.—The northwestern markets showed strength and St. Louis was better, and this, with relatively firm cables, started shorts to covering. There was also a fair demand for long account. December opening about steady at 77½@ 7½c. And the general tone showed improvement. It soon became apparent that there was no outside support and general liquidation set in and only ceased when the December option had receded to 75½c. The weakness in corn had an influence on wheat values. Some buying on the decline, influenced by an urgent cash demand from Minneapolis, caused part of the loss to be regained at the close, with a steadier tone. December finished at 16½c. There was firmless in corn at one time and after an early slump prices went slightly over the opening. Commission house buying on the decline, with light offerings, were the influences, and aside from these there was little to give strength to the market. December closed at 45½d.45½c. a net loss of 1½c.

In sympathy with other grains, oats developed weakness and prices broke materially. December closed off ½c at 37½c.

Packers were heavy sellers of provi-
